	MPM reviewed on 10 th June 2019	
	Board reviewed 9 th December 2025	
	September 2019 – minor amendments made to reflect Trust Status	

1. Requirements of investment strategy

Any Investment by Arden Multi-Academy Trust needs to:

- Be as risk free as possible;
- Adhere to guidelines as specified in the Academy Trust Handbook ('The Board must ensure that investment risk is properly managed') and any subsequent DfE revisions.
- Have the approval of the AMAT Audit & Risk Committee;
- Optimise returns (relative to a low risk environment) and accessibility.

2. Current situation

The schools/academies in the Trust currently invest in short term fixed interest deposits with Lloyds Banking Group. These are on a mix of 1/3/5/6/9 or 12 monthly cycles to enable the investment situation to be reviewed each month. These certificate of deposits run alongside the AMAT current account. At maturity, a decision is taken on whether to re-invest in whole or part and on what time frame based on a review of the cash flow forecast.

3. Responsibilities of the CFO and the Finance Team

The CFO will decide the following:

- At maturity of the deposits, make a decision on whether to re-invest or not based on a review of the cash flow forecast.
- Monitor rates of the deposits by benchmarking with products from other similar banking organisations.
- Refer to the AMAT Audit & Risk Committee for prior approval to any proposed changes to the current investment arrangements.
- Report each term to the AMAT Audit & Risk Committee on current status of investments across the Trust.
